linkedin.com/in/debashishbordoloi • github.com/d43ash1sh

PROFESSIONAL SUMMARY

Entry-level engineer with strong foundation in system analysis, networking basics, and technical deployment workflows. Experienced in testing, troubleshooting, and coordinating technical tasks through hands-on work in security research and full-stack development. Seeking to contribute to enterprise service delivery, installation, and network operations in a field-driven environment.

TECHNICAL SKILLS

Networking & Systems: Basic Networking, HTTP Protocol Analysis, Linux CLI, System Monitoring

Deployment & Testing: Application Testing, Debugging, System Validation, Vulnerability Assessment

Security: OWASP Top 10, IDOR, XSS, SSRF, CSRF, Reconnaissance

Development: MERN Stack, REST APIs, Backend Systems

Tools: Git, Postman, Burp Suite

Cloud: AWS (S3), GCP

Other: Team Coordination, Technical Documentation, AI-assisted Development

EXPERIENCE

Security Researcher

Nov 2023 – Present

Bugcrowd & HackerOne

- Performed testing and analysis of web applications to identify vulnerabilities.
- Conducted reconnaissance and system-level assessments (similar to survey processes).
- Documented findings and coordinated with stakeholders for issue resolution.
- Ensured system reliability through continuous testing and validation.

Full Stack Developer

Oct 2023 – Dec 2024

CNCF Guwahati

- Built and maintained web applications with focus on deployment workflows.
- Assisted in debugging, testing, and system integration processes.
- Worked in collaborative team environments for smooth project execution.
- Gained exposure to deployment pipelines and system troubleshooting.

OWASP Chapter Leader

Nov 2023 – Apr 2024

OWASP Foundation

- Coordinated cybersecurity workshops and technical events.
- Managed communication between teams and participants.
- Led initiatives ensuring smooth execution of activities.

PROJECTS

Host-Based Intrusion Detection System (HIDS)

- Designed monitoring system for detecting system-level anomalies.
- Performed testing under simulated real-world scenarios.
- Analyzed logs and system behavior for issue detection.

Subz - Subdomain Enumeration Tool

- Developed tool for system discovery and reconnaissance.
- Automated data extraction and analysis processes.
- Used in real-world testing and assessment workflows.

Decentralized Secure File Storage System

- Built distributed system with secure file handling.
- Implemented access control and system architecture design.
- Explored system deployment concepts using decentralized models.

AuthHub - Developer Dashboard

- Built full-stack application with authentication and API integration.
- Implemented system-level data handling and reporting features.
- Worked on debugging and performance improvements.

EDUCATION

M.Tech in Computer Science Rajiv Gandhi University, Arunachal Pradesh	2025 – Present
Master of Computer Applications (MCA) Rajiv Gandhi University CGPA: 7.80	2023 – 2025
Bachelor of Computer Applications (CTIS) Assam Down Town University CGPA: 8.07	2020 – 2023

CERTIFICATIONS

API Penetration Testing — EC-Council
Ethical Hacking Essentials — EC-Council
Network Defense Essentials — EC-Council
SQL and Relational Databases — IBM (Big Data University)

ADDITIONAL INFORMATION

Languages: English (Professional), Assamese (Native)
Availability: Willing to work in field roles, relocation-ready
Interests: Networking, System Deployment, Cybersecurity, Backend Systems
